

INNOVATIVE PRACTICES IN MY CLASSROOM

Thanks to almighty who is my inspirer and teacher always. once again I thank him for giving me this opportunity to pen about my experience of teaching here

I was inspired by my commerce teacher one who supported me in my studies .I am a life long learner by learning new techniques to teach my dear ones. To become a good communicator I am improving my communication skills to be strong enough to share with love ones. To create passion among my students about their subject daily I update me. To engage them in learning I foster them with positive environment .I make myself adaptable and patient to clear their doubts in subjects. I dedicate myself to help my students to succeed to score more knowledge about the subject. I create a space for my students where they feel supported motivated and inspired to learn.

My qualities as a good teacher:

- Being effective communicator: I explain the concept clearly and ensure students knowledge and understanding.
- Listening skill :I look over all students whether they understood the concept and check their listening skills in between by asking some questions.
- I like to inspire my students so I inspire them through enthusiastic learning) (discuss about their interesting matter like politics, sports, science extra)
- I understand that students have different styles of learning to connect with their emotional level and I show empathy by creating a mutual support.
- I often change my teaching methods and strategies to meet my students diverse needs by showing videos or clips.
- I engage them in classroom activity and I used to give varieties of activities inside the classroom and some project works as homework.
- I make students to be dedicated to achieve their full potential by asking feedback and encouragement.
- I prepare well, organise and manage time efficiently.
- I use humor and creativity to make learning more enjoyable.
- I as a good teacher treat all my students equally by promoting safety and respect . And teach them respect, obedience, discipline and knowledge to my children to become a good human being.

I follow some innovative teaching methods for higher students:

1. Flipped classroom: Students read concept at home from text books or by seeing videos and class time is used for discussion, problem solving and hands on activities.
2. Gamification: I design elements to make learning more increasing and interactive (example: reward , appreciation , prize for completing task.
3. Mission base to learning: if the students completed class work note with neat presentation and or quest to learn new skills I provide with stars in the note as well as in their hands too.
4. Challenge learning: Students participate in challenges that require them to apply their talents or applied in knowledge of thinking (example :real world problems or discussed about some MNCs)
5. Social sharing :I share their progress, achievements OR creations on social media.
6. Peer feedback: I asked students to provide feedback to each other for promoting critical thinking and collaboration.
7. Game based learning: students play games that teach them specific skills or concepts.,(example voting system to elect leaders)
8. Active learning strategies:
Think-Pair -share: Students work in pairs to discuss topics to promote their critical thinking and collaboration.
9. Case studies: Some real world examples are used to teach complex concepts and to promote the year critical thinking.
10. Debates :I encouraged students to engage in debates for promoting the public speaking and argumentation skills.
11. Group projects: Students are given group projects to work together to achieve a common goal promoting teamwork, communication and problems solving skills .
I appreciate students for their effort to keep their environment clean suggest classroom cleanliness, planting trees, helping hands etc.,
