

## **INNOVATIVE PRACTICES ADOPTED IN CLASSROOM.**

**- R.SANGEETHA, GRADE- JKG - CLASS TEACHER.**

Innovative Practices in Classes encourage the students in learning their subject in enthusiastic way. These Practices indulge students in active participation and active learning. According to myself, the best way of teaching/learning a concept or a word is achieved through the process of innovative teaching methods. The subjects I handle for grade JKG are EARLY EVS, EARLY MATHS AND EARLY ELGA. To grab the attention of students in my class is by doing some activities regarding the subject matters. These ideas promote active learning, sensory development, and foundational skills in a fun and engaging way.

In Every Morning, I will use warm up section on Rhymes Such as "JOHNNY JOHNNY YES PAPA" "ROLL ROLL YOUR BOAT" "LISTEN TO THE MUSIC" etc some sort of this I used towards them. Later I ask some general Questions to learn about themselves.

### **EARLY EVS:**

Environmental Science deals with facts and experiments regarding our surroundings. As for Grade JKG activities such as follows:

- i. School Tour : Walking around our school and learning the things, Plants, are seen and learned.
- ii. Body Beats” Freeze Game: Play music. When it stops, call out a body part. For Example: “Touch your elbows!” or “Wiggle your toes!” Children freeze while touching or moving that body part.
- iii. Art Activity: Let children trace their hands or feet and color them.
- iv. Worksheet Follow-Up: Matching activity — draw lines from body part words to pictures.
- v. Rhymes: To make students more efficient in learning Singing Song is best way to inculcate the learning process within them.

### **EARLY ELGA:**

- i. Phonic song: Dancing and learning each Alphabet Sound per day.
- ii. Letter Hunt: Hiding the Flash card of Alphabet in my classroom and ask the students to find the Alphabets. It indulge in Active Learning and builds curiosity in them.
- iii. Picture Talk: Showing the picture of any alphabet and make them to learn the word of the picture as well as the Alphabet. Like wise for any active verbs or words this is method is very useful for students because it make them in memorize the words.

### **EARLY MATHS:**

- i. Hop on numbers and Roll Dice are effective methods in teaching the numbers of the students of Grade JKG.
- ii. Counting Chicken: It literally means of counting the objects found in the classroom, homes etc.
- iii. Merry go Round: Numbers Learning.

Apart from above these I make them Drawings and Colouring are used towards students.

### **General Strategies for All Subjects**

Use Smartboards: Display visual and auditory content in an interactive format.

Learning Through Art: Integrate drawing, clay modeling, and craft into all subjects.

Choice-Based Learning Centers: Let children choose their learning activity from a set of theme-based centers.

Digital Portfolios: Teachers record short videos or photos of children's progress to share with parents.
